Subject: Heads up - invitation to information briefing on PFAS measurement project in NJ

Colleagues – you will shortly receive from me a forwarded invitation to a briefing on 9/25 relating to an ongoing PFAS survey/measurement project in NJ, a collaborative effort between NJ DNR, EPA R3 and ORD/NERL. If there are others in your organization who should listen in, please forward the invite to them as well.

Briefly, the project is similar to the work we have done in recent years in Cape Fear River NC using nontargeted chemical analysis to discover novel PFAS in water and soil samples. We are starting to get some preliminary results, and we want to make sure you are aware of the work.

Ex. 5 Deliberative Process (DP)

Below is a copy of the EPA-NJ study plan, and links to two papers referencing the Solvay chemical which we think we are finding (in addition to other PFAS).

Regards, Andy
